About Us

At Emaar Executive, we assist businesses to better perform their operation. In our modern world, with the increase of importance in ICT solutions for companies and individuals to enhance their day-to-day operations, Emaar Executive was founded in 2016 with a vision to provide innovative, reliable, and technologically advanced solutions for our domestic market

We provide integrated solutions for planning, designing, developing, and implementing systems solutions, data centers, structured cabling, IT network infrastructure solutions, physical and cyber security, CCTV, audio-visual, low current, and smart destinations. We assist contractors, end customers, enterprises, and government sectors by implementing their projects effectively and conclusively.

Emaar Executive is ISO 9001:2015 (QMS), 14001:2015(EMS) and 45001:2018 (OH&S) certified, which ensures that our services meet the needs of our clients through an effective quality, environment and occupational health & safety management system.

Vision and Mission

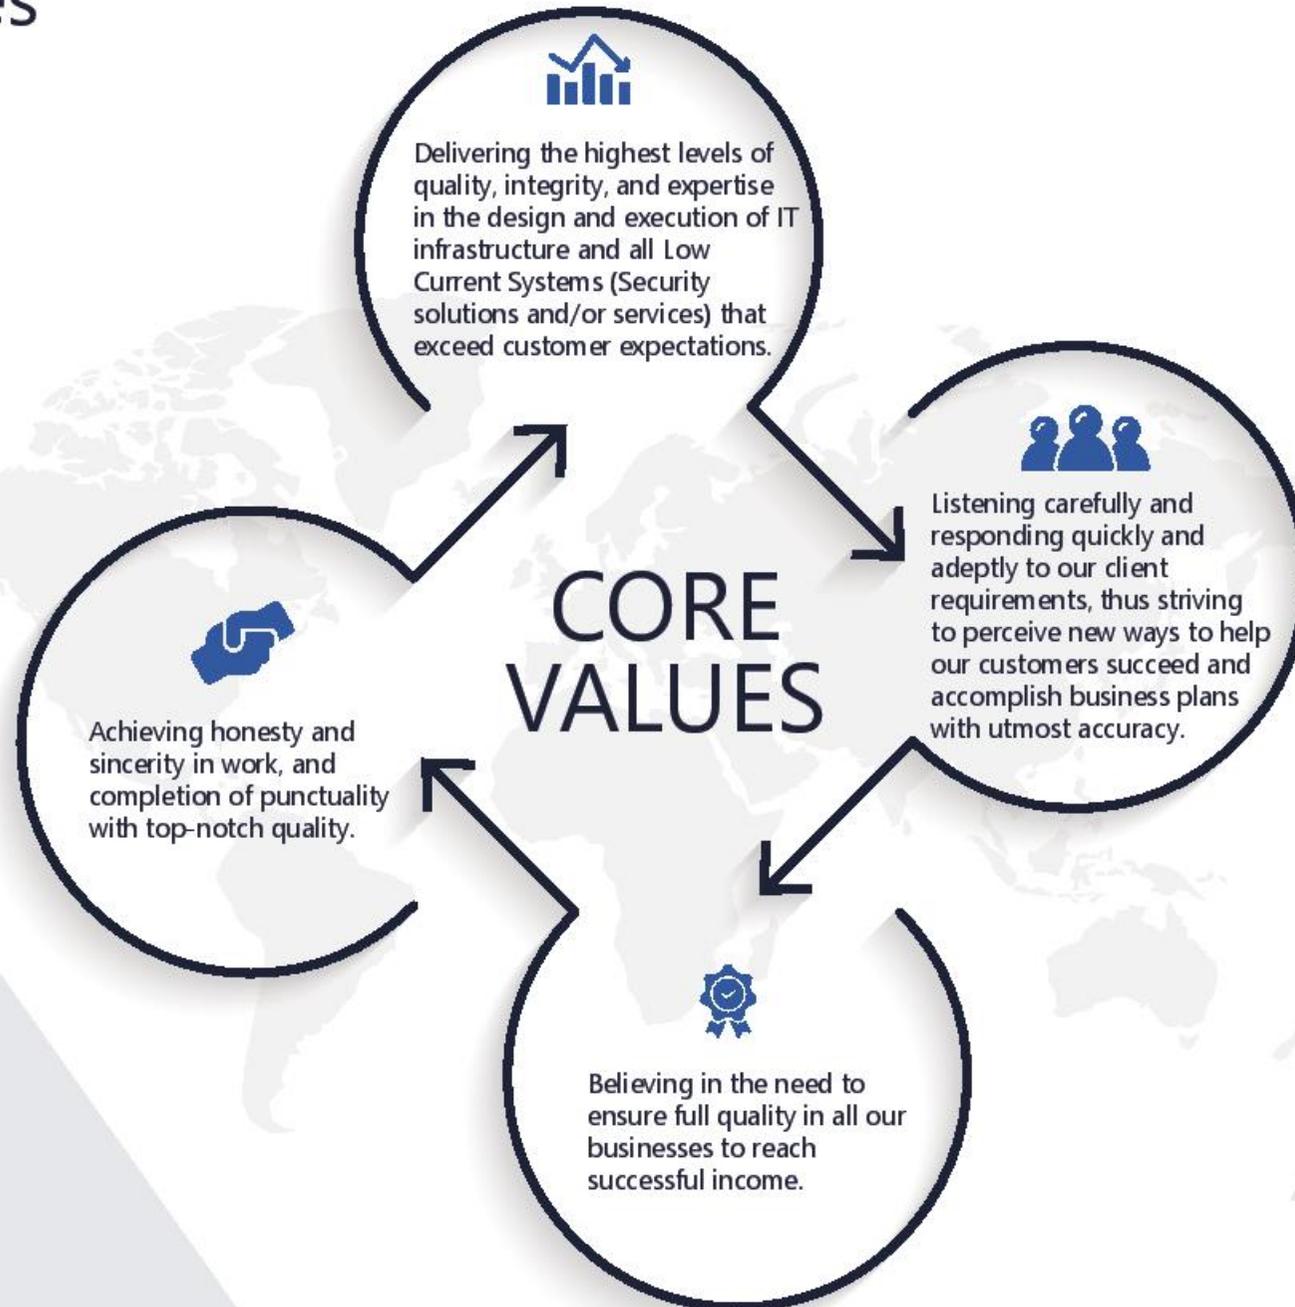

Being the premier system integrator and the regional reference with global standards.

Delivering world-class client-centered products, services, and solutions across the IT spectrum with international standards and par-non quality.

Core Values

More Info

What We Offer

1 Technical Advice

Our high-skilled engineers provide our customers with the best practice technical expertise complying with international standards of each proposed solution.

2 Designing

By gathering customer needs, our pre-sales engineers are ready to translate needs into requirements thus converting it to a clear scope of work and solutions.

3 Installations

EEC's highly skilled and certified team, 200+ technicians, and engineers assure to complete the project in exclusive quality and on time.

4 Maintenance

We have made a motto for ourselves to provide comprehensive customer care.

Solutions

Solutions

ICT Data Center Solutions

As a first-class data center integrated, EEC provides customers with turnkey innovative, sustainable, cut-edge, and value-engineered solutions fitting the current business needs and supporting future growth requirements.

The intelligent services and solutions are brought to customers through highly experienced and well-talented professionals following strict quality management standards, and empowered with best-of-type infrastructure products and solutions that include but are not limited to the following:

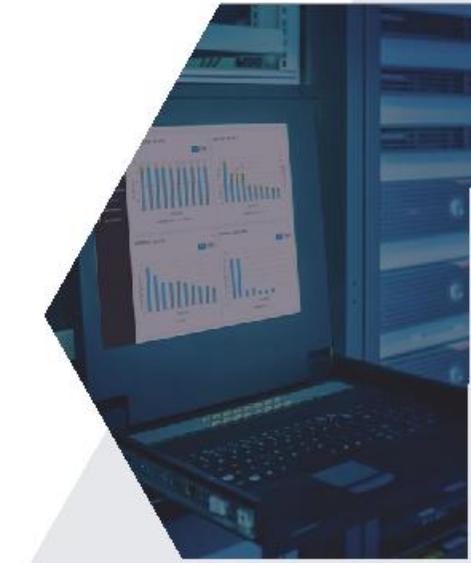

- ▶ Power Solutions (AC & DC Systems, generators, static & rotary UPS's, MV & LV electrical cabling and distribution systems, sub-stations & transformers etc...)
- ▶ Mechanical Systems (thermal management system, chillers, InRow & InRoom CW and DX precision air conditioning CRAC/CRAH, humidification control, clean agent fire suppression systems, liquids leak detection systems, early warning fire detection systems, etc...)
- ▶ Architectural Systems (Data Center Facility civil works, fire-rated doors, and partitioning, access floor systems, false ceiling, technical furniture, etc...)
- ▶ ICT racks and enclosures, hot and cold aisles containments, infrastructure pathways.
- ▶ Security Systems (access control, CCTV, Public Address System, etc...)
- ▶ Monitoring and Management Systems (DCIM, CAFM, BMS, SCADA, battery
- ▶ Data Center Deep Cleaning

ICT Data Center Solutions

The data center portfolio includes the entire Data Center lifecycle that covers planning, consultancy, design, complete site preparation, implementation, optimizing, assessment, migration, and certifications. Testing and commissioning, training, program management, facility operation and maintenance of data centers of any type and any size ranging from the micro data centers, containerized, up to the pre-fabricated modular data center solutions. A wide range of Auditing & Assessment Services are delivered by EEC in order to suit customers' specific requirements that include but are not limited to:

- ▶ Facility Space, Power, and Cooling Assessment
 - ▶ PUE, EMF, and CMN Assessment
 - ▶ Facility & Operation Risk Assessment
 - ▶ Data Center Certifications for Design, Facility, and Operation
 - ▶ Thermography Scan
 - ▶ CFD Assessment
 - ▶ Functional Testing
 - ▶ Energy Audit

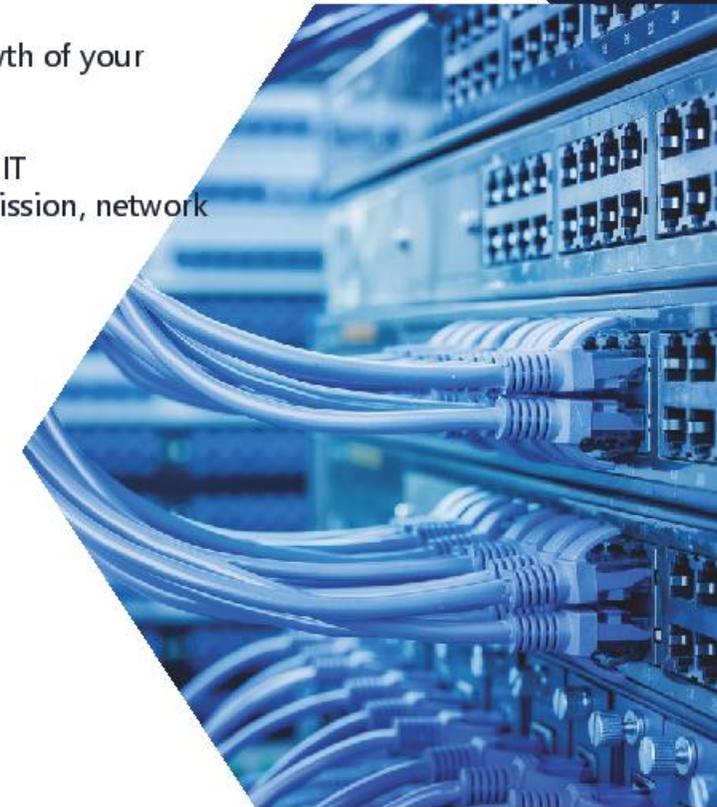

Structured Cabling & Network Solutions

As an industry leader in IT infrastructure design, consulting, and enterprise networking, EEC provides you with a cutting edge Structured Cabling Systems designs that ensure your IT services are working professionally, reliably, sustainably, fast, and at high-performance.

EEC's solutions ensure that your infrastructure is future-ready and will exceed the continuous growth of your business, Improved productivity, reduce costs, and increase flexibility.

With a properly planned and implemented Structured Cabling Solutions from EEC, you avoid your IT Communication the common network problems of increased latency, unnecessary packet etransmission, network congestion, data corruption, and crosstalk. Structured Cabling & Network Solutions include:

- Network infrastructure Strategy Services
- Network infrastructure Optimization Services
- Network infrastructure Integration Services
- Network infrastructure Deployment Services
- Network infrastructure Assessment Services

Systems & Networking Solutions

EEC provides integrated solutions for the systems and networking infrastructure that enable providing the best reliable and automated technology helping the customers to meet their business achievement and needs. Systems and Networking solutions include but are not limited to:

- ▶ Hyperconverged Infrastructure.
- ▶ Storage Solutions.
 - ▶ Servers and Mission Critical Computing
 - ▶ Infrastructure Virtualization
 - ▶ Backup and Disaster Recovery Solutions
 - ▶ Cloud Computing
 - ▶ Client and End User Computing
 - ▶ Software Defined Networking
 - ▶ Unified Communication and Collaboration Solutions
 - ▶ Networking Performance Monitoring

More Info

Cyber Security Solutions

EEC mission is to provide services and solutions that defend and maintain the availability of the customers applications and services by providing the right required protections solutions. Cyber Security solutions include but are not limited to:

- ▶ IDS and IPS Solutions
- ▶ EPP and EDR Protections
- ▶ Application Security
- ▶ Information and Database Security
- ▶ Network Security
- ▶ End Point Security
- ▶ Compliance and Risk Analysis

Structured Cabling & Network Solutions

Design, implementation, and administration of the Structured Cabling Systems are brought to clients by a highly professional and certified team that enables leverage and merging advances in intelligent Networking and benefit from the best-of-breed solutions, EEC is giving customers the power of choosing from our alliances and technology partners. EEC professional methodology in designing & implementation are the following:

- ▶ Site Survey to study the case and works on the existing shop drawing plans.
- ▶ Design steps to getting the optimal solution for full IP communication solution.
- ▶ Provide a detailed project plan as projects management professional standard.
- ▶ Allocate the IP points, cables, uplinks and cabinets.
- ▶ Supply all the required materials and items to site.
- ▶ Installation by a certified installer team.
- ▶ Termination and splicing with calibrated machines with latest technology.
- ▶ Testing with calibrated and high-quality machine for fiber and copper.
- ▶ Provide all the needed documentary work as testing report and as built drawing.

More Info

Physical Security Solutions

Keeping the working environment safe requires the maximum-security system to authorize and control all accesses and monitor all activities of the employees. EEC provides its customers with a variety of cutting-edge physical security solutions that fit the customers needs. A wide range of physical security solutions is supplied by EEC in order to suit customers' needs that include but are not limited to:

- ▶ Video Surveillance System
- ▶ Access Control System
- ▶ Intrusion Alarm System
- ▶ Parking Management System
- ▶ Time Attendance System
- ▶ Gate Control System
- ▶ Screening System
- ▶ Perimeter Detection System

Safety Solutions

EEC offers a wide range of safety solutions to clients who wish to improve the site security, reliability and commercial profitability of their business with innovative technologies. We have access to multiple systems solutions based on the customer including yet not limited to the following:

- ▶ Fire Alarm System
- ▶ Fire Aspiration System
- ▶ Fire Fighting System
- ▶ Voice / Emergency Evacuation System

More Info

Control Solutions

EEC offers a broad range of bespoke and forefront control system solutions to clients who are looking to authorize and control all access and monitor of any facility size. Control solutions include but are not limited to:

- ▶ Building Management System
- ▶ Lighting Control System
- ▶ Nurse Clock System
- ▶ Integrated Security Management System
- ▶ Master Clock System
- ▶ Public Address System
- ▶ Home Automation System

More Info

Audio-Visual & Video Wall Solutions

We deliver products and services form a complete solution, catering to a wide array of customers in different sectors and industries such as Oil & Gas, Power Generation, Aviation, Land Transport, Military, Security, Banking & Finance and Telecommunications and residential sector users. Audio -Video Solutions include but are not limited to:

- ▶ Video Wall System
- ▶ Digital Signage system
- ▶ Interactive Video System
- ▶ IPTV System
- ▶ Background Music System
- ▶ Video Conferencing System

More Info

Professional Services

Data Center Professional Services

- ▶ Datacenter Design covering product, Systems, and Complete Solution, Both Conceptual & Detailed
- ▶ Facility / Product / Design - Optimization
- ▶ Project Management
- ▶ Infrastructure Condition Assessment
- ▶ Infrastructure Capacity Assessment
- ▶ ASHRAE Level 1 to Level 5 QA, Scripting, Testing, and Commissioning
- ▶ Space, Power, and Cooling Capacity Analysis
- ▶ CMN (Common Mode Noise) analysis and resolutions
- ▶ Environmental/Thermal Assessments (IR Imaging)
- ▶ Energy Assessments, PUE monitoring & Analysis
- ▶ Data Center Migration
- ▶ Electromechanical, ELV and LC installation/Construction
- ▶ ISO 14644 Deep Cleaning

Resources and Rental Services

- ▶ Hire Project Managers
- ▶ Skilled Laborers Rental
- ▶ Non-Skilled Laborers Rental
- ▶ Professional instruments, tools, and equipment Rental

Datacenter Facilities Operations & Maintenance Services

- ▶ Operations Risks Assessments
- ▶ Total Facility Management (TFM)
- ▶ Technical Facility Management (TcFM)
- ▶ Data Center Facility Operation (DCFO)
- ▶ Data Center Facility Operation & Management (DCFOM)
- ▶ Operations & Maintenance Processes and Procedures
- ▶ Operations Runbook
- ▶ CAFM Computer Aided Facility Management
- ▶ Preventive, Corrective, Predictive, and On-Call Maintenance Programs

Data center Certifications

- ▶ Tier Gap Analysis
- ▶ Pre Certification Service
- ▶ Design Certification TCDD / DCDV
- ▶ Construction Certifications TCCF / DCCC
- ▶ Operation Certification TCOS / DCOS

Data center Training

- ▶ Custom Product/Equipment/Technology Training
- ▶ Facility Operation Training
- ▶ Professional Certification Training
CDCP/CDCS/CDCE/CTDC/CDFOM
