

Introduction

faco is the exclusive agent for American and European companies for the latest waterproofing and thermal insulation products in the Gulf Cooperation Council countries. Faco is the leading and most efficient company in the field of insulation with modern materials produced and used in America and Europe according to international standards and During these years, the company was able to complete and develop many projects faco applications are specialized for waterproofing concrete and metal surfaces using the latest American and European technologies for polyethylene powder (polymers) by using thermal spray machine also we use cold and hot polyurea. We at faco work and treat our customers with absolute integrity and the highest ethical standards, and work with the most accurate quality standards at competitive prices

Advantages Of Polyethylene Thermal Spraying Powder

The Use Of Melted Plastic Polymers In Conjunction With Thermal Spray Devices - Safe To Use With Drinking Water And Has An American Certificate (NFS-61) - Resistance To Acids And Environmental Factors - Concrete And Metal Surfaces Coating & Corrosion Protection Limited Warranty Up To (30) Years - Maintenance Not Required

Applications for Waterproofing Of Concrete And Metal Surfaces With Polyethylene

Foundations - Roofing - Parking - balcony Garages - Tunnels- Swimming Pools, waterproofing Tanks - expansion joints Repair - Concrete Cracks of All Types

Waterproofing With pure cold applied polyurea

is a liquid waterproofing membrane based on pure cold applied polyurea. It cures to form a seamless, durable and weather resistant waterproofing solution with an elongation of 1500% with excellent thermal stability.

Cold applied with a roller or brush - Elongation of 1500% - Excellent thermal stability -
Durable and weather resistant waterproofing - 25 years factory warranty

Fisco Applications For Waterproofing And Thermal Insulation

Thermal Insulation With Polyurethane - Waterproofing With Bitumen - Epoxy Paint -
Sandblasting - Concrete Injection - Rust removal

Application

Expansion Joint - Building Roofs - Basements - Tanks - Floors - Parking Garages -
Manholes - Sewage Pipes - Water - Basins, Water Pipes, Gas Lines

Fisco Applications For Waterproofing And Thermal Insulation

Polyurethane Thermal Insulation - Bitumen Waterproofing - Epoxy Paint for floors, corridors, electrical rooms and parking lots - Sandblasting & rust removal from any surface - Concrete Injection

Design and implementation of Way finding signs with anti-carbon epoxy paint for commercial centers, malls, shopping centers, and car parks

Isolating of all types of Metal and concrete Structures from Rust and Moisture

Fisco is very active in commercial, industrial, and private projects, but we also offer waterproofing and thermal isolation study and consultation, solution services to consultant architects, engineers, and building owners on new construction projects no matter how small or big.
