EXCELLENCE

OVERVIEW

WHY GAZALA STEEL FABRICATION?

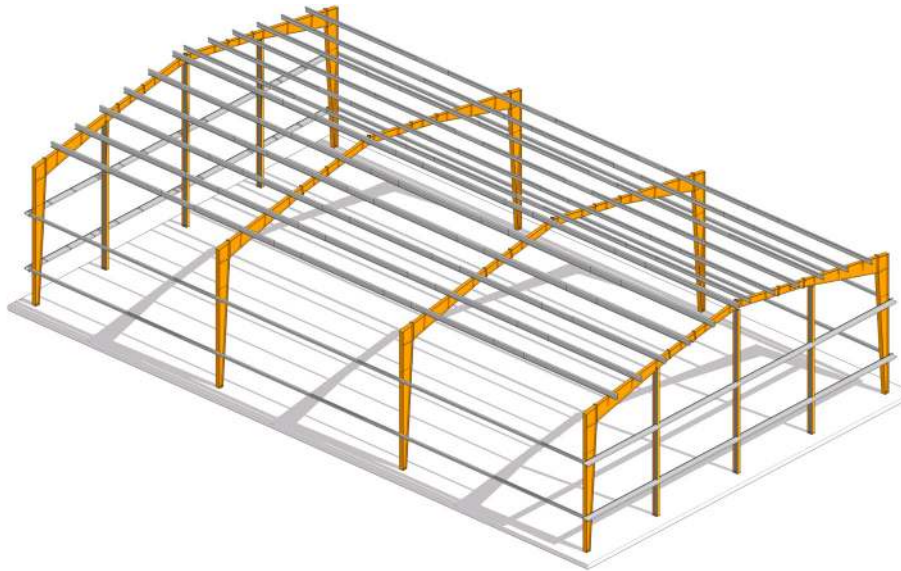

Gazala Steel Fabrication is a brand that stands for consistency and creativity through providing optimized fabrication solutions that fit our clients' needs and expectations throughout delivering commitment. With the efforts of our experienced engineers and technicians who save no effort developing, GSF has always shown brilliant innovation helping clients develop unique solutions.

STANDARDS AND PROCEDURES

In an Industry in which standards for configuration and dimensional tolerances must be kept in mind, we ensure the compliance to such procedures. From constructed buildings to roads and bridges, structural steel is the strength of built structures as a versatile structure material. It is the backbone of our infrastructure and it is relied on every day for strength, durability and longevity.

Gazala Steel Fabrication offers complete fabrication solutions, from initial design and planning to final delivery and installation. With our optimized solutions, commitment and volume of production, we have the capacity to meet your requirements and expectations.

DESIGN & DETAILING

Supported by the latest and most advanced softwares, our design, detailing and drafting team provide assistance and clear visions to our clients during all phases of a project through economical designs that reduce scrap and enhance steel erection.

EXPERTISE

Our Formula for success is built around our fabrication process and our highly trained team, with over 200 technicians exhilarating true craftsmanship with knowledge and passion to produce high quality grade steel products.

STEEL STRUCTURES

- Warehouses
- Power Stations
- Cement Plants
- Food Preparation Plants
- Truss
- Caravans
- Containers
- Pipe Racks

Client Name: Orientals for Urban Development
Project Name: Citrus packing station
GSF Scope: Supply and installation of structural steel

Client Name: American International Contractors Inc / Archirodon Egypt S.A.E
Project Name: Al- Galala marble complex
GSF Scope: Installation of structural steel

Client Name: Petrojet
Project Name: Pipes concrete coating factory
GSF Scope: Installation of structural steel and mechanical equipment

Client Name: BBM Terminal Corp. Houston, USA
Project Name: BBM terminal
GSF Scope: Supply structural steel

Head Office

Building 156, 1st street, 2nd District, 5th Settlement,
New Cairo, Egypt.
