# The Problem Pipe Leaking

**Leaking pipes are every where, the moment we get to notice it, it is too late.**

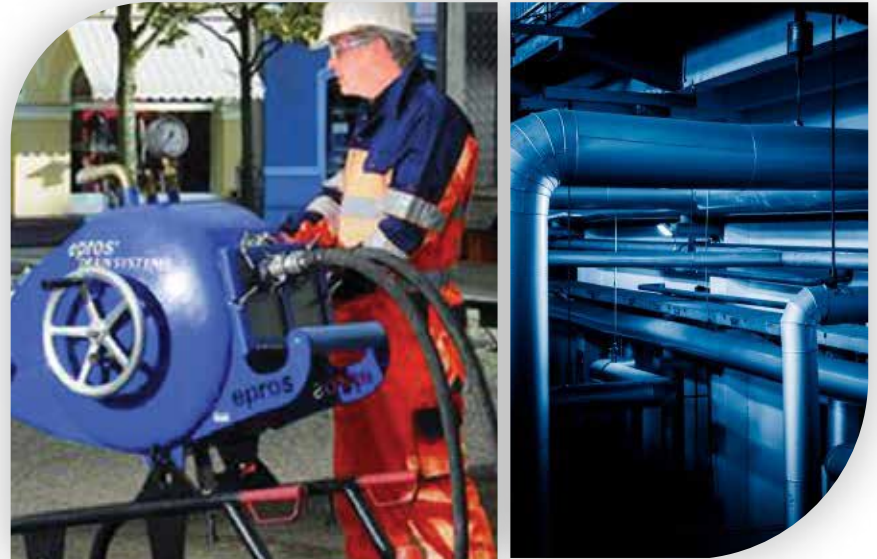

Leaking pipes are the biggest reason for water overconsumptions and inflated utility bills, a leaking pipe can double the water utility bill, ruin bedding materials, disrupt normal daily operations and even stop a business.

# The Solution Trenchless Pipe Lining

**Trenchless pipe lining is the future of leaking pipes solution.**

Trenchless pipe lining is the introduction of a felt liner inside the leaking pipe, through a remote access point, inflating the liner and curing it with in a couple of hours, and the system can go back to service on the same day, without any interruption to daily operations of the facility

# The Advantages Trenchless vs Excavation

**Trenchless pipe repair is the direct solution for the leaking pipes problem.**

While conventional pipe repair methods create other intermediate problems to be solved like excavation, digging, landscaping, finishing.... Trenchless pipe lining eliminates all these unnecessary obstacles and tackles the problem directly and with minimum execution time.

## Our Services

**APPLIED PIPELINE SERVICE** (Part of Applied build & fix Technical Services LLC) is a specialist trenchless pipe repair company, with the experience and capability to offer a solution to any leaking pipe.
