Facility Management

Landscape

Healthcare

BUILDING MATERIALS

Our building materials unit manufactures and supplies a wide range of products across Egypt. It provides standard building materials to contractors working on projects that range from office complexes to state-of-the-art LNG facilities. This business unit operates various business lines including steel fabrication, readymix concrete, wood workshops, aggregate quarries, pipes and concrete products. It provides essential support to our own group of companies and also works with local and international clients to create bespoke solutions that fulfil each project's requirements.
