

Intelligence-based HSE Software to Improve Health & Safety

Digital HSE

Digitise your HSE forms, documents and workflows to automate and streamline HSE activities across your projects. With mobile optimisation, your workforce and contractors will have access to all the safety critical information they need.

Welfare Compliance

Improve welfare compliance with real-time reporting, issues management and remedial access - all direct from site with reporting happening instantly. Close issues, fix defects and drive better welfare compliance.

Heat Stress

Manage heat stress through instant alerting of extreme heat and weather with automated data flows from weather services and government guidance. All your heat stress management in one place with geo-location spatial control.

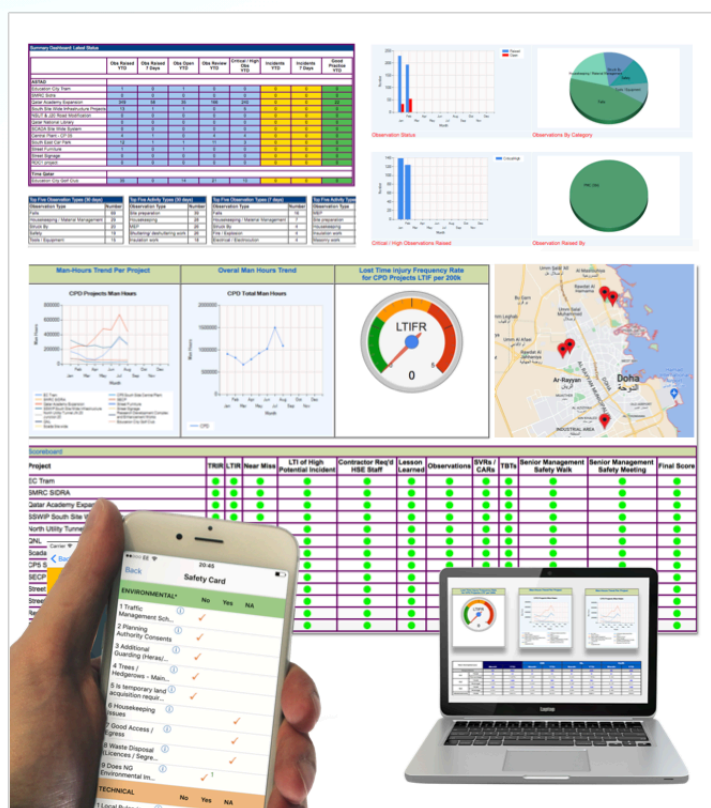

Issues Register

Defects, issues and remedial actions can now be closed in real-time through contractor alerts & reminders. Review evidence with in-built approval workflows to ensure your contractors put safety first and correct defects safely.

360° Learning

With Acumen Improve Safety Software by your side - you have the tools for true 360° safety learning across your organisation and contractors. Safety messages are controlled and managed with full audit capability at hand.
